

Trusted Worldwide Supplier
ASPHALT ROAD SOLUTIONS

About ANTROCEL

A BRIEF BACKGROUND

In 2000, we embarked on our journey as a supplier of pure cellulose fiber, Antrocel-P. Over the years, we expanded our product range to include cellulose pellets, Antrocel-G and our cutting-edge adhesion promoter for asphalt, AntrocelBond.

Paving the way for progress as a
journey of proper choices and
actions, both big and small, that
simply shape a flourishing future

IS OUR VISION

Roots of ANTROCEL

HOW WE STARTED

The company founder B. Aliukonis

At that time, I was involved in the paper recycling business and had no idea what kind of product cellulose fiber was. But the handful of fiber I received from the road builder greatly intrigued me. "Turn on your head and organize production" – he said. My partners and I managed to "spin" fiber production in just one year.

What Makes Us Stand Out

ECONOMIC PROSPERITY

Opportunities for financial prosperity
and sustainable growth

ENVIRONMENTAL HEALTH

Long-term health and vitality of our environment

RELATIONSHIP FOR SUCCESS

Approachable, responsible, fun and simple

ANTROCEL

CAPABILITIES DECK

This overview of our capabilities and experience in manufacturing cellulose fibers and asphalt additives should give you an idea of value you can gain buying or partnering with us. Don't hesitate to reach out to us in case you have any questions or if you want to discuss your ideas in depth.

Our Production

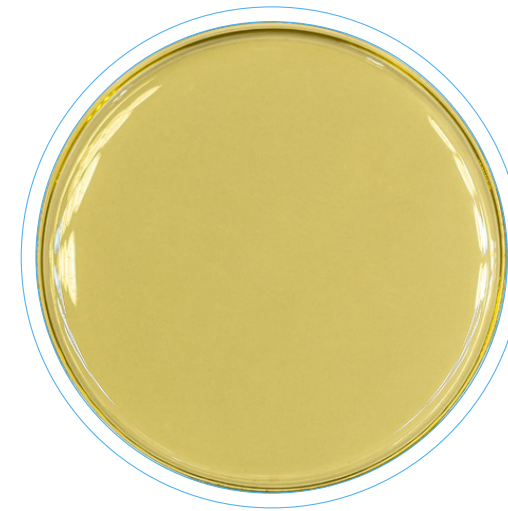

WHAT WE OFFER

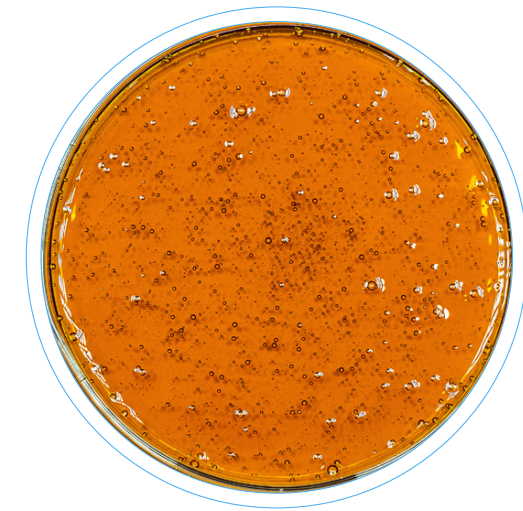

Cellulose Pellets
ANTROCEL-G

Cellulose Fiber
ANTROCEL-P

Tar Remover
ANTROCEL-AAK

Adhesion Promoter
ANTROCELBOND

Probably The Best

CELLULOSE IN THE MARKET

IMPROVING QUALITY AND PERFORMANCE

Reduced rutting and cracking, even under heavy traffic loads

SIGNIFICANCE

Exceptional binder absorption capacity

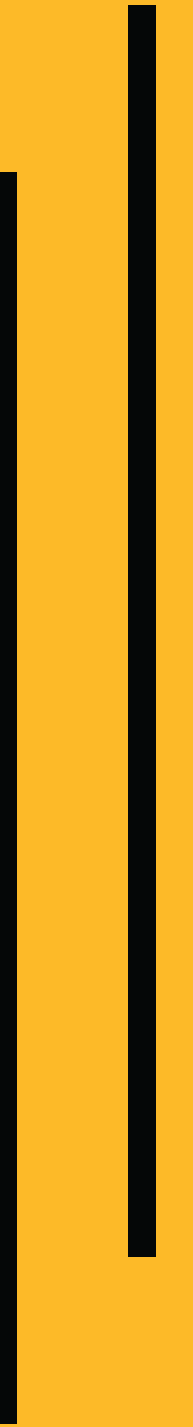

ANTROCEL CELLULOSE APPLICATIONS

Prime application in stabilizing
Stone Matrix Asphalt (SMA) Mix

Stone Matrix Asphalt

OPTIMIZED PERFORMANCE,
SUPERIOR DURABILITY AND
A GREENER TOMORROW.

ANTROCEL-G fiber pellets are engineered to enhance the performance of SMA asphalt mix even at lower mixing temperatures of +120°C

Why Cellulose Fibers?

THE MOST WIDELY USED STABILIZERS

Known for exceptional binder absorption capacity

IMPROVED DURABILITY

Leads to reduced maintenance costs

ENHANCED STABILITY

Resistance against heavy traffic loads and temperature fluctuations

KEY Features

NO HARM

Precisely sourced raw materials

SIGNIFICANT POWER

Oil absorption up to 6 times for Antrocel-G

PROVEN QUALITY

The test of time, along with the fulfilment of needs and expectations of our customers

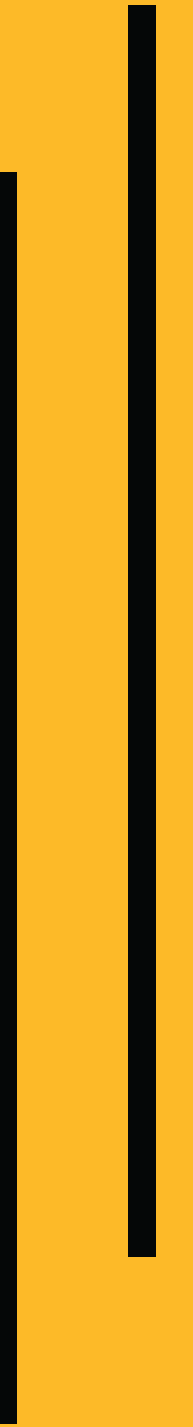

SUSTAINABILITY AT HEART

Reusable packaging, solar power, and an unwritten policy of giving back to the planet

Must have items

FOR ROAD CONSTRUCTION
PROFFESIONALS

Prevention to sticking with ANTROCEL-AAK

PHASE 1

Apply directly on
asphalt truck body

PHASE 2

Ensure thorough coverage

PHASE 3

That's it!

PHASE 4

You are ready to transport
asphalt to the worksite

Adhesion Promoter **Antrocelbond**

Bio-based

Planet conscious

Non-Amine and
Non-Silane Based

Non-Acidic

> 80%

SALES EXPORTED
WORLDWIDE

simply possible

up to 50%
